## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 26-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shiozaki et al. (USPN 4,366,093) in view of Eichhorn et al. (USPN 4,740,644).

Shiozaki et al. discloses a cylindrical molded catalyst suitable for a fixed bed reactor. The mechanical strength of the tubular moldings prepared by extrusion is smaller than compression moldings.

Shiozaki et al. does not disclose the reaction.

Eichhorn et al. discloses a supported catalyst with a tubular reactor. The oxychlorination process is carried out with careful monitoring of the temperature, since the oxychlorination reaction is highly exothermic. This system is used in the preparation of 1, 2-dichloroethane.

It would have been obvious to one of ordinary skill in the art at the time of the invention to use note the exothermic reaction, because this common type of reaction.

### ***Allowable Subject Matter***

Claims 13-14 are allowed.

***Response to Arguments***

Applicant's arguments filed 4/5/07 have been fully considered but they are not persuasive.

Applicant argues that metallic catalyst is not taught. The examiner respectfully disagrees because metallic components are taught, that is: cu-halide, fe-halide, cr-co-oxide, cu-oxide, mo-oxide and so forth.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).
